SOCIAL MEDIA / CONTENT AND ANALYTICS

Strategy with intention. Content with identity.

I turn ideas into a visual direction, a content plan, and Reels that express each brand's identity.

I combine a creative perspective with Instagram analytics. I edit content and guide its creation so every post serves a clear objective.

01 **I understand the brand.** I listen to the business context and review its profile, content, and audience to identify priorities.

02 **I provide direction and shape.** I organize ideas, the calendar, and visual criteria; I edit Reels and support the creation of other assets.

03 **I analyze and refine.** I distinguish visibility, engagement, and inquiries to propose next steps with clear objectives.

I work with brands that want to communicate more effectively, with particular expertise in fashion and beauty.

Content in Motion

I edited these Reels for Candy Lash: an everyday humorous scene and a talking-head explanation.

My editing includes assembly, on-screen text, and adaptation to vertical format. I also guided the creation and editing of other brand Reels.
